

《研究生学术英语写译教学（工作坊）》

思考与练习 (参考答案及提示) **红色删除线部分为历年考过题目，不用复习！**

第二讲

1. 中西文化存在哪些差异？试举例说明。

文化的概念极其广泛，除了生活环境、宗教、历史等方面（参见第二讲第一节）以外，还包括政治、哲学、饮食、服装、行为习惯等诸多方面，而每一方面中西方都会有很大差异。

1. 中西思维方式存在哪些差异？试举例说明。

（参见第二讲第二节）

2. 中西思维方式如何体现在语言中？试举例说明。

（参见第二讲第三节）

3. 文化和思维方式差异对研究生英语写译有哪些影响，如何避免负面的影响？

（参见第二讲第四节）

5. 参考译文

~~1) Since a sophisticated strategic missile consists of thousands of components, that any of them malfunctions will lead to missile launch failure.~~

2) The operation of a drone requires basic knowledge of physics.

3) CNIPA (China National Intellectual Property Administration) is in charge of protecting intellectual property

4) The figure shows the motion of an object.

5) An improvement of its performance can be effected by the use of super-heated steam.

~~6) A comparison of radio waves with water waves is made.~~

7) Carrier rockets have found application for the exploration of the universe.

~~8) The feature of the model is the absence of interference.~~

9) So an experiment was set up from which the position of the sun was excluded.

10) The adoption of this new device will greatly cut down the percentage of defective products.

11) In the last four decades since the Opening Up Policy, we have achieved a series of breakthroughs in infrastructure.

12) This distortion is minimized by proper circuit design and suitable choice of the operating point.

~~13) There is a growing consensus of artificial intelligence in the society.~~

14) A short calculation will convince you that this is indeed true..

15) Friction neglected, the output will be equal to the input.

6. 参考译文

~~1) 这种方法的发明者所表现的远见卓识和渊博知识,给人以非常好的印象。~~

2) 元件技术中起主要作用的是半导体元件

3) 最好的导体电阻最小, 最差的导体电阻最大

4) 放射性物质可用来查明各种腺体和器官的功能

5) 限于篇幅,我们不能在此对这个问题作进一步分析。

~~6) 在1903年,居里夫人成为第一位女性诺贝尔奖获得者。~~

7) 科学家们一直关心全球变暖的问题。

8) 在各种可见光中,红光的波长最长,紫光的波长最短。

9) 这是一个非常热门的话题。

~~10) 人们早就怀疑,大气层中有一个“高温带”,其中心在距地面约30英里的高空。利用火箭进行研究后,这一奇异的事实得到了证实。~~

11) 全世界对于STEM人才的需求与日俱增。

12) 不屑于干自己工作的人终于有一天会发现自己不配干那份工作。

13) 我们必须“全力以赴”对我们的科研体系进行现代化改造。

14) 论文总结了计算机、人造卫星、火箭三方面的成就。

~~15) 远距离输电需要高压,安全用电需要低压。~~

7. 分析要点

a. 过度使用第一人称

b. 没有按照英语先概括后具体的习惯组织文章,内容贫乏。

c. 词汇、句式过于简单

d. 上下文缺少衔接,过度使用 and

e. 搭配不够地道

参考习作

Education plays an important role in a person's journey of life. To a modern person, he or she should regard education as a lifelong process in order to achieve his or her fulfillment in today's society.

Education strengthens modern people's competence in fighting against fierce competition. With the development of science and technology, modern people are unfortunately replaced by some machines. Those laid-off workers won't be favored by employers unless they can make use of education to master advanced skills or technology required by employers. Mr. Li, my old neighbour, has to go back to night school to learn computer skills because his boss had warned him that if he couldn't update his knowledge he would undoubtedly become the unnecessary burden of the working unit.

What's more, education helps modern people to realize their dreams in spite of their age. Today, people often find that more and more senior citizens decide to take the college entrance examination. Zhao Xingang, an old worker in his age of seventy, is preparing for next year's

college entrance examination. He said “It's my dream to go to college. When I was young, I was deprived of the right because of poverty. Now I won't give up this opportunity.” His wife and children also show their agreement on his decision. According to the statistics, in the year of 2001, there are 42 “old students” around China who had taken the exam. A famous Chinese saying goes like this, “It's never too old to learn.” Maybe that saying can express the feelings of those old college students. Actually, education acts as a sharp weapon which assists modern people to push human society forward. With the power of education, people on different posts in society can fully display their talents and wisdom. With the help of education, people are able to grasp the spirit of tradition and promote it in a brand-new era. Education is closely connected with modern people's life. That's why Chinese government chooses education as the national policy for the following years.

Education deserves modern people's attention and enthusiasm. Its indispensable function is too crucial to be ignored. With the accompany of education, life will be more meaningful to every modern person. Therefore, education is a lifelong process and a meaningful process as well.

《研究生学术英语写译教学（工作坊）》

思考与练习 (参考答案及提示)

第三讲

1. 翻译下列句子，注意多义词语的翻译

- 1) 太阳是太阳系的中心**天体**。
- 2) 飞机的速度与**机身**及机翼的形状有关。
- 3) **人体**需要在宇宙飞船中进行专门训练才能适应失重状态。
- 4) 战场上只剩下具具**尸体**。

2. 翻译下列句子，注意黑体词语的褒贬。

- 1) 她的**志向**是成为一名科学家。
- 2) 一个满怀**抱负**的人通常努力工作。
- 3) 该声明彻底揭露了了他们霸占世界的**野心**。
- 4) 我们有一项**雄心勃勃**的计划：使用全新的卫星数码技术进行广播。

3. 翻译下列句子，注意划线词语的转译。

- ~~1) 现在对这种电脑的需求**大大**增加。~~
- 2) 我的邻居**计算**很强。
- ~~3) 电视通过无线电波**发射和接受**活动物体的图像。~~
- 4) 这是有机化学历史中最为有趣的一章，所以值得进一步**关注**。
- ~~5) 我们都**熟悉**一个事实，那就是光年是距离的单位，而不是时间的单位。~~
- ~~6) 物体一旦**运动**，就会因惯性而持续运动。~~

4. 翻译下列句子，注意使用增词法、减词法和重复法

- 1) 在通讯系统中，电子学要解决的问题是如何把信息从一个地方传递到另一个地方。
- 2) 种种尖锐的问题困惑了大部分学生。
- ~~3) 如果没有改变物体运动的原因，那么物体将作**匀速直线运动**。~~
- 4) 尽管美国在研发领域的投资在绝对值上持续增长，但是其他国家的研发投资增长更快。
- 5) 地球绕轴自转，引起昼夜的变化。
- 6) 炉壁采用耐火砖可大大降低热耗。
- ~~7) 已经证明，**感应电压使电流的方向与产生电流的磁场力方向相反**。~~
- 8) 政府已经发行了新的硬币，但只有少数人见过。
- ~~9) 看来这两个科学分支是**相互依存，相互作用的**。~~
- 10) 美国的研究资金投入领先世界好几十年，但这种领先状况将在 2019 年拱手让给中国。

5. 翻译以下段落

参考译文:

Internet of Things emphasizes the interrelatedness between objects and is viewed as a network connecting objects via different kinds of information sensing equipments. The Internet of Things is characteristic of effective communication on “4As”, which is to say, anytime, anywhere, anyone and anything. It is the focal point of research in all fields throughout the world. Modern distance open education uses modern informational technology to enable the students to break the limitation of traditional education.

6. 请参照中英文句子结构的差异, 将下列几句话译成中文。

~~1) 没有电压, 就没有电流。~~

2) 中国纸巾生产厂商领头羊之一的上海东方造纸厂完成了能源改造项目, 即从厂外的煤炭发电到厂内的天然气发电的转变。

~~3) 不同的制造方法可简化为单件生产和批量生产, 单件生产指小批量的生产, 批量生产指生产大量相同的部件。~~

4) 最有可能携带日冕能量的是声波、引力波以及其他好几种波, 近 40 年来, 科学家一直按这种思路进行研究。

7. 将每组句子改写成一句话。

1) The docking event between the spacecraft and the ISS (International Space Station) seems to be slow, but it is because both the spacecraft and the ISS are traveling at roughly the same speed---more than 17,000 miles per hour.

~~2) I would like to apply the best university of the US with a purpose to help me expand my horizon.~~

8. 请翻译下列定语从句。(请注意使用下列译法: 前置定语译法、分句译法、压缩融合译法以及状语化译法。)

1) 科学家们分析了过去半个世纪登陆的北大西洋飓风。

~~2) 这次安全对接标志着美国宇航局 (NASA) 和 SpaceX 公司的一个里程碑式的合作, 他们为此已经合作了 10 年, 以确保人类的太空飞行能以重返地球。~~

3) 为了更好地为客户服务, 你必须要有与众不同的技术, 而且还得拥有懂得这种技术的人才, 把这种技术提供给客户, 对客户真正有用。

4) 沿海地区需要做好应对更强烈飓风的准备, 但内陆社区也需要做好准备, 因为他们可能没有应对这种强风或强降雨的专门知识或基础设施。

5) 势能虽不像动能那样明显, 但它存在于许多物体之中。

~~6) 二氧化氮是空气中主要的污染物, 但对它的研究还远远不够。~~

9. 请翻译下列英语长句。(请注意使用下列译法: 顺译法、逆译法、分译法和综合译法。)

1) 几十年的研究已经阐明了从环境中得到的感官输入是如何被处理的。

2) 将固体加热到足够温度时，它所含电子就有一部分离开表面，飞逸到周围空间中，这种现象叫做热离子放射。电子管就是利用这种方法来产生自由电子的。

3) 这项研究结果确实确定了一种先前未知的机制，它可以很好地调节通路上的信息，并确定了新皮层最顶层的一种特殊类型的神经元是这些自上而下信号的动态看门人。

~~4) 研究人员发现，他们用超级计算机模拟的每一个飓风都不尽相同。有的飓风登陆的强度相同，而在温暖水域形成的飓风却要花更多的时间减弱强度。~~

思考与练习 (参考答案及提示)

第四讲 【可不看，不用复习】

1. 英汉篇章差异有哪些？试举例说明。

英汉篇章差异在微观上体现为衔接手段如照应、替代、省略、连接、词汇重复等方面的差异，在宏观上体现为语篇模式的差异。

微观差异可以概括为两点：显性和隐性，重复与替换。汉语中代词可以省略，连接词语也较少使用，通过时间顺序或逻辑顺序等隐性连接方式来衔接上下文；英语中代词不能省略，上下文一般要有过度词语，衔接方式多呈显性。汉语较喜欢词汇重复的方式，英语倾向于使用近义词语、代词以及其它手段替代上文内容，不喜欢重复相同的内容。例如：

Wrought iron is almost pure iron. It is not frequently found in the school shop because of its high cost. It forges well can easily be bent hot or cold, and can be welded.

熟铁几乎就是纯铁。熟铁在校办工厂里不太常见，因为价格很贵。熟铁好锻，很容易热弯，还能够焊接。（冯丽妍、王显志，2008）

以上译例中，英文原文中多次使用代词 it 来避免重复，而汉语译文中则多次重复“熟铁”，体现了英汉替换与重复的衔接差异。再看下例：

杨志取路。不数日，（）来到东京。（）入得城来，（）选个客店，（）安歇下。

Yangzhi set out. After a few days, he came to Dongjing. Entering the city, he found a hotel and had a rest.

汉语原文中指代上文的“杨志”时都采取省略代词的形式，而译成英语后则必须加上这些代词，否则不合语法，上例体现了英汉隐性与显性的衔接差异。

宏观差异体现在：英语更强调形式上的严谨，段落和语篇结构多为“演绎式”（谢小苑，2008），段落一般要有主题句（topic sentence），文章要有主题陈述（thesis statement），然后用细节或实例来支撑。语篇中多用一些标记性词语，使得条理清晰，层次结构清楚，衔接自然流畅。汉语段落和语篇多为“归纳式”，讲究“起、承、转、合”，考虑时间事理顺序，喜欢从细节或事实出发，最后总结。如：

Energy resources are the natural ones of a country, such as mineral wealth, potential water, power, and the productivity of the soil. Energy is very important in the world, for it supports the development of almost all the branches in the society, such as industry, agriculture and people's life. In other words, it is indispensable for human beings. Some of the energy is nonrenewable, such as mineral resources and water resources. And nowadays these kinds of energy are becoming less and less with the progress of the society. So we have to make efforts to save them. Recent awareness of the energy shortage in America has brought the bicycle into renewed popularity. Citizens go to work and school by bike instead of getting the car out of the garage. Owners of bicycle sale-and-repair shops find their business booming. Many cities have set aside “bike ways”

for the cyclists. More and more Americans are discovering it is cheaper and less polluted to go to work by bike. (张艳丽, 2004)

这段文字中的主题是：“近期美国对能源缺乏的意识使自行车再度流行”。但该段开头有好几句与段落主题无关。说明作者是受汉语曲线思维的影响，没有开门见山点出主题。

1. 英汉段落如何构成？

英语的段落一般由主题句、扩展句和结尾句组成。段落的发展方式主要包括：举例、比较与对比、因果型与果因型、分类、下定义、问题与解决方法或建议等。

3.

1) 句式单一，主次不明，逻辑性差

修改稿：

For most people, choosing a career is not easy. Yet it is one of the most important decisions you have to make in your life. If you can find the right career, you are more likely to live a happy and successful life; if not, you will probably face a lot of trouble. It pays, therefore, to explore your choice of occupation from every angle, collect as much information as possible, and even try different kinds of work before making up your mind. Above all, evaluate yourself. Be sure that you know your own interests and talents.

2) 过渡词使用不当

Personally, I know that a person's life is short. Some people think that it is a blessing to be indifferent, and to live a safe and comfortable life is the happiest thing. I don't disagree with that, but I don't recognize it. Maybe I am too young now, and I think that when I come into this world, I should try my best to live a strong life instead of a mediocre one. Therefore, my dream is to struggle out of my own world with my own efforts, because I think it's only when I'm standing at a certain level that I'm capable of doing what I want to do, including caring for the people around me.

4. 参考译文

电脑能储存、检索和传递大量信息，且速度之快前所未有。这固然很好，但这却严重关系到资料的安全性和个人隐私，因为电脑本身是不安全的。最近美国、德国、英国的黑客和资料窃贼闯入最复杂的金融和军事系统也是易如反掌，新型的高科技罪犯布下的令人恐慌的骗局日益增多，这些骗局包括在订机票中做手脚和重编移动电话芯片的程序等。

5. 参考译文

As a typical form of sharing economy, online car hailing has been booming in recent years and brought travelling convenience to the public, and car sharing, which gives consideration to the interests of all relevant parties, is the most representative business type of shared travel. However, the extensive development and blind expansion of car sharing have brought

various potential safety hazards to online car hailing. Especially, serious regulatory loopholes exist in the management of car sharing. According to the existing laws and regulations, car sharing has not yet been included in the regulation scope of online car hailing, no specific requirements have been raised for the access threshold of vehicles and drivers, and the carrier liabilities that should be undertaken by the platforms are unclear. So, the government should strengthen its supervision on online car hailing, change its supervision mode, balance the interests of relevant parties from the angle of economic administrative law, and establish a more scientific and perfect joint supervision system, so as to better protect the safety of the public as well as the long-term development of online car hailing. .

6. 修改稿

China Dream in My Eyes

In recent years, China Dream has become a popular topic in daily life. As our President Xi said, "To realize the great rejuvenation of the Chinese nation is the greatest dream of the Chinese nation since modern times." That means we need to build a rich and strong country, a rejuvenated nation and own a group of people who live a happy life.

In my opinion, China dream means inheritance. It bore a long history and splendid civilization of more than 5000 years of the Chinese nation. In modern China, the centenary history of humiliation struggle and self-improvement of the Chinese nation was inherited. Sun Yat-sen led the Revolution of 1911 and overthrew the feudal monarchy. After the unremitting fierce struggle of more than 20 years, the Chinese Communists established the new China. National independence and the liberation of people have opened a new era for the progress of the Chinese nation.

China dream also means development. It records the hard journey of the Chinese Communist Party in leading people in building a new, prosperous and strong democracy in China. As Zhou Enlai once said, "The scale of our state planning is extremely ambitious at the outset. The task before the people is glorious and huge." As Comrade Mao Zedong once said, "Without industry, there will not be welfare for the people nor prosperity for the country. "

China dream represents powerful and prosperous too. In order to establish a nation, one must be strong enough. It leaves one vulnerable to attacks if he lags behind. It is a major issue of survival and decline for a country to be prosperous. Only by promoting the sustained and healthy economic development can we establish the material foundation for the prosperity of the country, the happiness and well-being of the people and the harmony of society.

7. （开放式答案）

《研究生学术英语写译教学（工作坊）》

思考与练习 (参考答案及提示)

第五讲

1. 翻译下列句子，注意运用转译的方法。

- 1) 路面结了冰,加上能见度很低,导致了这场交通事故。
- 2) 光速极快,这就是为什么我们会以为我们能在事物发生的一霎那看到它们发生的原因。
- 3) 眼睛持续暴露在强光中会导致失明。
- ~~4) 火箭已用来探索宇宙。~~
- 5) 建立这些大型钢铁厂会大大加速我国钢铁工业的发展。
- 6) 地壳巨大的力在不断的起作用,使地壳的岩石不断改变形状。
- 7) 尽管公众不接受转基因食品,但目前已有多多种转基因产品上市。

2. 翻译下列句子，注意定语从句的功能。

- ~~1) 现在人们已经懂得,如果饮食中缺少了某些重要成分,即使食物不含有任何有害物质,也会引起严重疾病。~~
- 2) 对于任何机器来说,如果知其输入功率和输出功率,就能求出机械效能。
- 3) 如果把一个线圈接在已充电的电容器上,电流就开始流过线圈。
- 4) 某些问题是商业版操作系统普遍存在的问题。
- ~~5) 任何商品的生产过剩都会带来麻烦,因为它会导致市场上供过于求,从而使价格急剧下跌。~~
- ~~6) 塑料是由水、煤和石灰制成的。水是取之不尽、到处可以获得的天然资源;煤是用自动化和机械化的方法开采的,成本较低;石灰是由煅烧自然界中广泛存在的石灰石得来的。~~

3. 翻译下列长句。

- ~~1) 我们越来越多地使用机器代替人力来完成工作任务,因为做这些工作对机器而言是轻而易举。这种趋势与我们越来越多地使用计算机密切相关。~~
- 2) 于是我们就面临着一种选择:要么利用技术来提供并满足迄今为止一直被视为并无必要的各种需求,要么利用技术来缩短人们为了维持一定的生活水准而必需工作的时数。
- 3) 合成材料通常称为人造材料。许多人造材料正逐步取代某些天然材料,这或许是因为天然制品的数量不能满足人们日益增长的需求,但更多的则是因为人们看中了合成材料的某种物理性能,并充分发挥这种性能,以便使合成材料在其应用领域中最大限度地发挥作用。

4. 翻译下列句子，注意重复信息的正确处理。

- ~~1) We must raise our awareness of the need to respect, accommodate to and protect nature.~~
- 2) Chinese medicine holds that the human body is the result of the balance of Yin and Yang, Yin **being** the inner and negative force, and Yang, outer and positive.

3) One way to make possible the reclamation of **the valuable substances** from coal **which** now go up the chimney as smoke is to turn coal into gas and coke.

~~4) The evolution of robot has so far undergone three phases. The first phase was the robot's infancy when it was called the "teaching and playback robot". In the second phase, the robot advanced into its youth and was referred to as the "sensory robot". While in the third phase, it bloomed into its adulthood, and was labeled "intelligent robot".~~

1. 翻译下列段落，注意各句主干的确定。

New Energy

The new energy has six major characteristics. First, **it will become** the driving force of various industries. Backed by technological breakthroughs, **the new energy industry will be** the engine for higher employment and greater economic growth. Second, **it will be contributive to** the strategic energy replacement that will provide fundamental solutions to energy shortage problems for sustained development of human society. Third, **it depends on** electricity generation for ultimate utilization. **The new energy is produced** mainly through its conversion to electricity, and 85 percent of the new energy resources are utilized to generate electricity. Fourth, **the output** of wind power and solar power **is different** from the conventional mode, which means the connection to power grid is relatively economical for its exploitation. Fifth, **the lower density** of new energy and **smaller** electricity generation **capacity make** it fit for distributed use. **The last feature is** its lack of competitive edge over the traditional energy, for its development is currently impossible without the policy support of world governments.
